- [Install Jenkins plugins](#)
- [Upload the GumGum archive](#)

Install Jenkins plugins

- If you are already lost, let's have a look at [Install Jenkins plugins](#) 😊
- From the Dashboard go to **Manage Jenkins > Manage Plugins > Available**
- Then install the following list of plugins using **Download now and install after restart** button

Plugin name	Description	Plugin documentation
Green Balls	Changes Hudson to use green balls instead of blue for successful builds	https://wiki.jenkins-ci.org/display/JENKINS/Green+Balls
JQuery plugin	This allows other plugins to use jQuery in UI.	https://wiki.jenkins-ci.org/display/JENKINS/jquery+Plugin
Simple Theme Plugin	A plugin for Jenkins that supports custom CSS & JavaScript. You can customize Jenkins's appearance (ex. his gentle face on the background).	https://wiki.jenkins-ci.org/display/JENKINS/Simple+Theme+Plugin

Upload the GumGum archive

- Download the following archive ([archive.tar.gz](#)) and execute the following steps:
 - Please replace **[pathToYourDownloadFolder]** by a valid path

```
scp -i ~/.ssh/id_rsa [pathToYourDownloadFolder]/archive.tar.gz ubuntu@yourHostName:~
ssh -i ~/.ssh/id_rsa ubuntu@yourHostName
sudo su
mv archive.tar.gz /var/lib/jenkins/userContent && cd /var/lib/jenkins/userContent &&
```

- | | |
|-------------------------|------------------------------|
| URL of theme CSS | ../..userContent/jenkins.css |
| URL of theme JS | ../..userContent/jenkins.js |

- Apply your changes and you should get the following template.
